AYUSH ARVIND KAMBLE

India, Mumbai
kambleayush69@gmail.com | +91- 7249268207
GitHub: https://github.com/ayushk1904
LinkedIn: https://www.linkedin.com/in/ayush-kamble

SKILLS

Programming Languages: Python (basic), JavaScript.

Frontend: HTML, CSS, React

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman

Concepts: REST APIs, Basic Authentication, Full Stack Web Development (MERN)

CURRENTLY LEARNING

Large Language Models (LLMs) – understanding fundamentals, use cases, and real-world applications

AI / Machine Learning Basics – core concepts, data handling, and model workflows

Backend Development – improving API design, data flow, and application structure

Project Management Basics – task planning, timelines, and team coordination

---

EXPERIENCE

Full Stack Developer / Project Contributor – Lakshya (Self-Initiated Startup Project) 04/2026 – Present

- Contributing to an early-stage startup focused on creative event assets, working on product design and frontend development.
- Built responsive user interfaces using HTML, CSS, JavaScript, and React.
- Developed reusable UI components, ensuring consistency and scalability.
- Collaborated with team members on feature planning, implementation, and task coordination.

International Summer Internship Program (ISIP) : 3D Object Rendering & Gaussian Splatting

Technical University of Sofia, Bulgaria

- Explored advanced 3D Object Rendering techniques, specifically focusing on the implementation and optimization of Gaussian Splatting.
- Developed high-fidelity 3D assets and environments using Blender and Unity, ensuring accurate lighting and texture mapping.
- Researched temporal consistency in multi-view rendering to streamline workflows for training neural radiance fields and point-cloud data.
- Collaborated in an international research environment to bridge the gap between traditional 3D modeling and AI-driven reconstruction.

Independent & Team-Based Projects (Academic + Personal) 09/2023 – Present

- Designed and developed multiple individual and team projects, handling frontend logic and basic backend integration.
- Participated in hackathons and college-level competitions, building functional prototypes under time constraints.
- Gained hands-on experience in end-to-end development, from idea to implementation.

PROJECTS

Lakshya – Learn * Grow * Evolve

- Developed a comprehensive AI-powered study assistant designed to centralize academic planning, task management, and exam preparation.
- Designed intelligent features including an AI proctoring system and a personalized study planner to optimize student learning workflows and progress tracking.
- Improved collaborative learning efficiency by integrating real-time study chats and progress monitoring, reducing friction in group academic coordination.

Circlo – Only Between Us

- Developed a centralized social interaction platform using the MERN stack, designed to streamline community engagement through organized "circles."
- Designed multi-modal communication features, including high-quality voice and video calling alongside an integrated AI assistant for enhanced user interaction.

Know the Law – Simplified Legal Information Platform (In Progress)

- Building a platform to provide authorized, easy-to-understand legal information.
- Working on content structuring and search flow for better usability.
- Focused on accessibility and clarity for non-technical users.

Digital Twin – Lead Developer / Designer (In Progress)

- Architecting an immersive platform using Gaussian Splatting and 3D Object Rendering to create photorealistic Digital Twins of real-world environments like hotels and airports.
- Developing high-fidelity spatial experiences by integrating complex Blender models into Unity, enabling interactive exploration via Virtual Avatars.

Education:

Bachelor of Engineering – Third Year Computer Science (AIML)

Vishwaniketan's Institute of Management Entrepreneurship and Engineering Technology (ViMEET) 2023 – 2027
